## Gross Domestic Product (Second Estimate), Corporate Profits (Preliminary Estimate), Third Quarter 2024

**Real gross domestic product** (GDP) increased at an annual rate of 2.8 percent in the third quarter of 2024 (table 1), according to the "second" estimate released by the U.S. Bureau of Economic Analysis. In the second quarter, real GDP increased 3.0 percent.

The GDP estimate released today is based on more complete source data than were available for the "advance" estimate issued last month. In the advance estimate, the increase in real GDP was also 2.8 percent. The update primarily reflected upward revisions to private inventory investment and nonresidential fixed investment as well as downward revisions to exports and consumer spending. Imports, which are a subtraction in the calculation of GDP, were revised down (refer to "Updates to GDP").

U.S. Bureau of Economic Analysis

Seasonally adjusted annual rates

The increase in **real GDP** primarily reflected increases in consumer spending, exports, federal government spending, and nonresidential fixed investment. Imports, which are a subtraction in the calculation of GDP, increased (table 2).
